01 PROFILE

I started my career as a software engineer at the age of 18, the more and more I'm into my job as a software engineer with responsibility for not just coding, but also manage, maintain, and planning software with different kind of technologies, platform, and team.

02 EMPLOYMENT HISTORY

Jun 2018 — Jan 2019

Kuala Lumpur

Software Engineer at EFOX SDN. BHD.

Efox is a currency exchange system focus company, we have the license for retail, wholesale, and also remittance. The technologies that we used are different on different projects. I was mainly focus on the retail related projects, I started to maintain our retail system that runs by 6 branches after I done building our internal own brand CMS portal for the admin used, then in the same time I maintain the retail system I was assign to another project to create a platform to allow people book the currencies online.

Mar 2019 — Nov 2019

Kuala Lumpur

Software Engineer at NEXPLATFORM SDN. BHD.

Nexplatform is a property technology company, and it's still growing. I joined them on 2019, and I was assign to their custom project team, which help them to grow their network for developing projects across their main product. the project first project that I was assign to is a B2B ecommerce website for the EIG. While the project is going on I was assign to another project to develop a designer used mobile app for the Padini.

Nov 2019 — May 2021

Kuala Lumpur

Software Engineer at TALENTCLOUD.AI SDN BHD.

Talentcloud is a cloud based HCM system focus company, we provide a very large HR solutions to our customer with different kind of modules in the HR system from recruitment to the employee termination. I joined Talentcloud as a front end developer at first, at that time I was working on different kind of modules on their FE UI UX designs, then I was transit to full stack developer on their new module for the performance, and I'm now focusing on the performance module with my manager, our performance module supports different kind of methodology that are using in the market example like OKR, KPI, and 4DX.

Senior Consultant, Solution Development at Fusionex

I work within the DFTZ department, where our main emphasis is on crafting customs solutions. In my capacity, I am responsible for crafting the underlying architecture of diverse modules like journey, cargo, license, warehouse, and others. My responsibilities span both the practical and non-practical aspects of these modules, all while maintaining project excellence through well-established regulations and benchmarks.

In addition, I am deeply engaged in research and development endeavors aimed at generating tools that elevate the experience for developers and optimize the interview process for prospective candidates. My commitment lies in fostering the growth of my team and bolstering our capabilities.

Furthermore, I am the one who formulates the task list for each sprint, ensuring that the back-end team stays aligned with the correct trajectory.

04 HOBBIES

I have too much hobbies, can't really tell them all in here but beside trying out and discover new technologies, I also love readings, and I highly recommend the book "The road less traveled" to people, and also I play instruments. It's very common that you see me hugging my guitar in front of my desk when I'm coding, but the only instrument that I've learned was acoustic drum, but I'm a tone deaf still trying to fix it.
